

Active09 – Subject Index

Papers listed by both Primary and Secondary INCE Subject Classification
Each paper will appear twice – once under the primary and
once under the secondary classification.
In this index, the individual paper links are not active.

10 EMISSION: NOISE SOURCES

11 Noise-Generating Devices

11.1 Mechanical devices

11.1.3 Gears

[ac09 311](#) *MIMO feedforward control of multi-harmonics gearbox vibrations using parallel adaptive notch filters in the principal component space*
Yann Pasco, Olivier Robin, Pierre Belanger and Alain Berry

11.4 Air-moving and distribution devices

11.4.1 Axial fans

[ac09 115](#) *Automatic positioning of flow obstructions to control tonal fan noise*
Anthony Gerard, Alain Berry and Patrice Masson

[ac09 342](#) *Experimental investigation of high airflow rate ventilation system with improved noise performance by passive and active means*
Catherine Guigou-Carter, Julien Maillard and Roland Wetta

11.5 Electric power devices

[ac09 197](#) *Experimental investigation of a generator for a linear magnetorheological damper*
Bogdan Sapinski

11.6 Other power devices

[ac09 078](#) *Active control of portable generator set noise: Heuristic versus design*
C.R. Fuller, C. Papenfuss and T.D. Saux

11.6.4 Engines

[ac09 439](#) *Engine speed tracking and reference generation for active noise profiling*
Marko Antila

- [ac09 574](#) *Active control of torque ripple for a hybrid powertrain: Application to a monocylinder diesel engine*
Jean-Philippe Gauthier, Philippe Micheau and Patrick Coirault

12 Stationary Noise Sources

12.2 Construction and demolition equipment

- [ac09 247](#) *Preliminary investigation of active control of a milling tool holder*
Henrik Akesson, Tatiana Smirnova, Lars Hakansson, Ingvar Claesson and Thomas Lago

13 Moving Noise Sources

13.1 Aircraft

- [ac09 034](#) *Active control of vibration in aircraft and inside the ear*
Stephen J. Elliott

13.1.1 Subsonic aircraft (fixed wing)

- [ac09 189](#) *Active acoustic solutions for a high speed turboprop transport aircraft*
Harald Breitbach and Delf Sachau

13.2 Highway vehicles

13.2.1 Automobiles

- [ac09 202](#) *Optimal active vibration control on a car for cancellation of road noise disturbance*
Walid Belgacem, Patrice Masson and Alain Berry

- [ac09 210](#) *Full active vehicle suspension - Experimental data*
Jaroslaw Konieczny and Janusz Kowai

- [ac09 323](#) *Structure-borne noise reduction through active control of vehicle suspension*
Xiao Dong Li, Benoit Boulet, Walid Belgacem, Alain Berry and Patrice Masson

13.2.4 Trucks

- [ac09 442](#) *Algorithm development and optimization for active noise control in a truck cabin*
Guangrong Zou, Marko Antila, Antti Lankila and Jari Kataja

13.5 Ships and marine vehicles

[ac09_402](#) *Multiple phase-corrected filtered-error LMS algorithm and its application to the ship interior noise*

Shunsuke Ishimitsu, Hiromi Nishikawa and Naoaki Shibatani

20 PHYSICAL PHENOMENA

21 Physical Mechanisms of Noise Generation

21.6 Flow noise, aerodynamic sound

[ac09 115](#) *Automatic positioning of flow obstructions to control tonal fan noise*
Anthony Gerard, Alain Berry and Patrice Masson

[ac09 867](#) *Challenges and applications for active noise and vibration control in aerospace*
Rudolf Maier

21.6.1 Produced by jets

[ac09 127](#) *Active noise absorber with tunable complex surface impedance*
Benjamin Betgen and Marie-Annick Galland

21.6.3 Blade vortex interactions

[ac09 854](#) *Active manipulation of flow-induced acoustic resonance*
Zhenbo Lu and Li Cheng

23 Propagation, Transmission & Scattering of Sound

23.1 Radiating surfaces

[ac09 128](#) *Research on the active control of radiation from a piston set in a rigid sphere*
Zhibin Lin, Jing Lu, Boling Xu and Qingyu Wei

23.2 Reflection and echoes

[ac09 472](#) *Estimation and global control of noise reflections*
Emmanuel Friot and Alexandre Gintz

23.9 Transmission

[ac09 506](#) *Development and experimental application of a pre-design tool for active noise and vibration reduction systems*
Olaf Heintze, Michael Rose, Stephan Algermissen and Malte Misol

30 NOISE CONTROL ELEMENTS

31 Barriers and Screens, Shielding

[ac09 258](#) *Performance of a virtual sound barrier near a reflective surface*
Xiaojun Qiu, Haishan Zou and Wei Rao

31.2 Partial-height partitions indoors

31.2.2 Barriers in open-plan offices

[ac09 774](#) *Noise reduction with active noise shielding system*
Shinya Kijimoto, Ikuma Ikeda, Yosuke Koba, Koichi Matsuda and Keitaro Kageuama

32 Enclosures for Noise Sources

[ac09 731](#) *Active noise control in three dimension enclosure using piezoceramics*
Guohau Han, Joris Degrieck, Wim Van Paepegem, Xiaoxiong Jin and Yanfang Hou

34 Filters, mufflers, silencers and resonators

[ac09 113](#) *An active resonator for vibration absorption*
Nikolay Kanev, Alexey Gladilin and Mikhail Mironov

35 Absorptive Materials

[ac09 334](#) *Active control of broadband noise using smart foams*
Abhishek Kundu, Alain Berry and Pierre Leroy

38 Special Treatments

38.2 Active noise control

[ac09 034](#) *Active control of vibration in aircraft and inside the ear*
Stephen J. Elliott

[ac09 118](#) *A new subband algorithm for active attenuation of broadband noise*
Iman Tabatabaei Ardekani, Waleed H. Abdulla and Sing-Kiong Nguang

[ac09 127](#) *Active noise absorber with tunable complex surface impedance*
Benjamin Betgen and Marie-Annick Galland

- [ac09_128](#) *Research on the active control of radiation from a piston set in a rigid sphere*
Zhibin Lin, Jing Lu, Boling Xu and Qingyu Wei
- [ac09_148](#) *Evaluation of the stability and performance of an uncertain active noise control system*
Kay Kochan, Eugen Weizel and Delf Sachau
- [ac09_174](#) *Combined MIMO adaptive and decentralized controllers for broadband active noise and vibration control*
A.P. Berkhoff and J.M. Wesselink
- [ac09_242](#) *The application of Steiglitz-McBride algorithm in active noise control*
Jing Lu, Haishan Zou and Xiaojun Qiu
- [ac09_243](#) *Spherical loudspeaker array modeling for active control of sound*
Dror Lederman and Boaz Rafaely
- [ac09_328](#) *Local active control of sound using a spherical loudspeaker array with spatial windowing*
Tomer Peleg and Boaz Rafaely
- [ac09_334](#) *Active control of broadband noise using smart foams*
Abhishek Kundu, Alain Berry and Pierre Leroy
- [ac09_402](#) *Multiple phase-corrected filtered-error LMS algorithm and its application to the ship interior noise*
Shunsuke Ishimitsu, Hiromi Nishikawa and Naoaki Shibatani
- [ac09_439](#) *Engine speed tracking and reference generation for active noise profiling*
Marko Antila
- [ac09_472](#) *Estimation and global control of noise reflections*
Emmanuel Friot and Alexandre Gintz
- [ac09_558](#) *Active noise control using a steerable parametric array loudspeaker*
Nobuo Tanaka and Motoki Tanaka
- [ac09_624](#) *Multi-channel broadband active noise control hardware system design*
Kai Chen, Jing Lu and Xiaojun Qiu
- [ac09_650](#) *A multi-input multi-output active noise cancelling system structure using subspace identification method*
Iwao Fujino
- [ac09_704](#) *Breathable wall with active noise control for heat pumps*
Maxime Keller and Christian Carme

- [ac09_731](#) *Active noise control in three dimension enclosure using piezoceramics*
Guohau Han, Joris Degrieck, Wim Van Paepegem, Xiaoxiong Jin and Yanfang Hou
- [ac09_753](#) *Experimentally validated vibration control using negative capacitance on a panel*
Benjamin Beck, Kenneth A. Cunefare and Massimo Ruzzene
- [ac09_774](#) *Noise reduction with active noise shielding system*
Shinya Kijimoto, Ikuma Ikeda, Yosuke Koba, Koichi Matsuda and Keitaro Kageuama
- [ac09_867](#) *Challenges and applications for active noise and vibration control in aerospace*
Rudolf Maier
- [ac09_927](#) *Disturbance attenuation for switched linear systems*
Jamila Raouf and Hannah Michalska
- [ac09_941](#) *Stabilization of switched linear systems for H_∞ output feedback*
Jamila Raouf and Hannah Michalska
- [ac09_943](#) *Illustration of source control methods for personalised sound field*
Mincheol Shin, Filippo M. Fazi, Philip A. Nelson, Sung Q. Lee, Kang-Ho Park and Jeongil Seo
- [ac09_968](#) *Feedforward active noise cancellation for MRI utilizing reference microphone*
Brent W. Rudd, Mingfeng Li, Teik C. Lim and Jing-Huei Lee
- [ac09_078](#) *Active control of portable generator set noise: Heuristic versus design*
C.R. Fuller, C. Papenfuss and T.D. Saux
- [ac09_189](#) *Active acoustic solutions for a high speed turboprop transport aircraft*
Harald Breitbach and Delf Sachau
- [ac09_247](#) *Preliminary investigation of active control of a milling tool holder*
Henrik Akesson, Tatiana Smirnova, Lars Hakansson, Ingvar Claesson and Thomas Lago
- [ac09_258](#) *Performance of a virtual sound barrier near a reflective surface*
Xiaojun Qiu, Haishan Zou and Wei Rao
- [ac09_442](#) *Algorithm development and optimization for active noise control in a truck cabin*
Guangrong Zou, Marko Antila, Antti Lankila and Jari Kataja

[ac09_805](#) *Measurement of a loudspeaker transfer matrix for hybrid active/passive absorbers*
Manuel Melon, Azzedine Sitel, Marie-Annick Galland and Philippe Herzog

[ac09_854](#) *Active manipulation of flow-induced acoustic resonance*
Zhenbo Lu and Li Cheng

38.3 Active vibration control for noise reduction

[ac09_365](#) *Smart double panel with decentralized feedback control units for blended velocity feedback*
Neven Alujevic, Paolo Gardonio and Kenneth D. Frampton

[ac09_424](#) *Stability and control performance of decentralised velocity feedback loops using triangular actuators*
Paolo Gardonio, Yohko Aoki and Stephen J. Elliott

[ac09_506](#) *Development and experimental application of a pre-design tool for active noise and vibration reduction systems*
Olaf Heintze, Michael Rose, Stephan Algermissen and Malte Misol

[ac09_594](#) *Single mode composite panel matrix for active structural acoustic control (ASAC)*
Yochai Editz and Alon Fleischer

[ac09_980](#) *Experiments with active control of sound radiation from vibration plates*
Ondrej Jiricek, Petr Svec and Vojtech Jandak

[ac09_343](#) *Experimental investigation to improve low frequency sound transmission by means of active control*
Catherine Guigou-Carter, Alain Roure, Julien Mallard and Cedric Pinhede

[ac09_344](#) *Numerical method to predict active control efficiency for a double panel separating two rooms*
Azzedine Sitel, Catherine Guigou-Carter and Philippe Jean

[ac09_358](#) *Active control of noise transmission through natural ventilation windows*
Huahua Huang, Xiaojun Qiu and Jian Kang

38.5 Change of configuration or design for noise control purposes

38.5.1 Smart structures

ac09 365 *Smart double panel with decentralized feedback control units for blended velocity feedback*

Neven Alujevic, Paolo Gardonio, Kenneth D. Frampton

40 VIBRATION AND SHOCK: GENERATION, TRANSMISSION, ISOLATION AND REDUCTION

41 Characteristics of Sources of Vibration and Shock

[ac09 594](#) *Single mode composite panel matrix for active structural acoustic control (ASAC)*
Yochai Editz and Alon Fleischer

[ac09 980](#) *Experiments with active control of sound radiation from vibration plates*
Ondrej Jiricek, Petr Svec and Vojtech Jandak

42 Vibrating Surfaces and Structures

[ac09 114](#) *Harmonic control of sound radiation and transmission of a plate using a virtual impedance approach*
Nicolas Quaegebeur, Philippe Micheau and Alain Berry

46 Vibration Isolators and Attenuators

46.2 Vibration Isolators

[ac09 671](#) *Redistribution of the energy in a vibration isolation system under the action of discrete frequency active control*
Simon A. Pope and Steve Daley

46.4 Active vibration control

[ac09 113](#) *An active resonator for vibration absorption*
Nikolay Kanev, Alexey Gladilin and Mikhail Mironov

[ac09 114](#) *Harmonic control of sound radiation and transmission of a plate using a virtual impedance approach*
Nicolas Quaegebeur, Philippe Micheau and Alain Berry

[ac09 210](#) *Full active vehicle suspension - Experimental; data*
Jaroslaw Konieczny and Janusz Kowai

[ac09 283](#) *Experiemental studies on decentralized velocity feedback control on thin aluminum and honeycomb sandwich panels*
Jens Rohlfig and Paolo Gardonio

[ac09 323](#) *Structure-borne noise reduction through active control of vehicle suspension*
Xiao Dong Li, Benoit Boulet, Walid Belgacem, Alain Berry and Patrice Masson

- [ac09_352](#) *Self-tuning control algorithm for decentralised active damping control units*
Michele Zilletti, Paolo Gardonio and Stephen J. Elliott
- [ac09_353](#) *Downscaling of decentralised feedback control units for active vibration control*
Paolo Gardonio and Cristobal Gonzalez Diaz
- [ac09_420](#) *Simulation of active suppression of boring bar vibrations by mean of boring bar's '1-D' finite element model*
Tatiana Smirnova, Henrik Akesson, Lars Hakansson, Ingvar Claesson and Thomas Lago
- [ac09_574](#) *Active control of torque ripple for a hybrid powertrain: Application to a monocylinder diesel engine*
Jean-Philippe Gauthier, Philippe Micheau and Patrick Coirault
- [ac09_671](#) *Redistribution of the energy in a vibration isolation system under the action of discrete frequency active control*
Simon A. Pope and Steve Daley
- [ac09_202](#) *Optimal active vibration control on a car for cancellation of road noise disturbance*
Walid Belgacem, Patrice Masson and Alain Berry
- [ac09_311](#) *MIMO feedforward control of multi-harmonics gearbox vibrations using parallel adaptive notch filters in the principal component space*
Yann Pasco, Olivier Robin, Pierre Belanger and Alain Berry

47 Vibration-Damping Materials and Structures

47.3 Damping of structures and panels

- [ac09_197](#) *Experimental investigation of a generator for a linear magnetorheological damper*
Bogdan Sapinski
- [ac09_352](#) *Self-tuning control algorithm for decentralised active damping control units*
Michele Zilletti, Paolo Gardonio and Stephen J. Elliott

50 IMMISSION: PHYSICAL ASPECTS OF ENVIRONMENTAL NOISE

51 Building Noise Control

51.1 Sound fields in room and enclosed spaces

51.1.5 Hospitals

[ac09 968](#) *Feedforward active noise cancellation for MRI utilizing reference microphone*
Brent W. Rudd, Mingfeng Li, Teik C. Lim and Jing-Huei Lee

51.3 Sound transmission thru windows, doors, walls, ceilings, floors

[ac09 343](#) *Experimental investigation to improve low frequency sound transmission by means of active control*
Catherine Guigou-Carter, Alain Roure, Julien Mallard and Cedric Pinhede

[ac09 358](#) *Active control of noise transmission through natural ventilation windows*
Huahua Huang, Xiaojun Qiu and Jian Kang

51.4 Sound-insulating structures, transmissions coefficients and transmission loss

[ac09 344](#) *Numerical method to predict active control efficiency for a double panel separating two rooms*
Azzedine Sitel, Catherine Guigou-Carter and Philippe Jean

51.6 Heating, ventilating and air conditioning (HVAC) systems

[ac09 342](#) *Experimental investigation of high airflow rate ventilation system with improved noise performance by passive and active means*
Catherine Guigou-Carter, Julien Maillard and Roland Wetta

[ac09 704](#) *Breathable wall with active noise control for heat pumps*
Maxime Keller and Christian Carme

70 ANALYSIS

71 Instruments for Noise and Vibration Measurements

71.1 Transducers

71.1.4 Transducers for sound generation and reproduction

- [ac09 390](#) *Harmonic distortion control of a nonlinear loudspeaker*
Alessandro Toso and Marty Johnson
- [ac09 805](#) *Measurement of a loudspeaker transfer matrix for hybrid active/passive absorbers*
Manuel Melon, Azzedine Sitel, Marie-Annick Galland and Philippe Herzog
- [ac09 243](#) *Spherical loudspeaker array modeling for active control of sound*
Dror Lederman and Boaz Rafaely
- [ac09 328](#) *Local active control of sound using a spherical loudspeaker array with spatial windowing*
Tomer Peleg and Boaz Rafaely
- [ac09 943](#) *Illustration of source control methods for personalised sound field*
Mincheol Shin, Filippo M. Fazi, Philip A. Nelson, Sung Q. Lee, Kang-Ho Park and Jeongil Seo

74 Signal Processing

74.3 Digital processing and simulation

- [ac09 118](#) *A new subband algorithm for active attenuation of broadband noise*
Iman Tabatabaei Ardekani, Waleed H. Abdulla and Sing-Kiong Nguang
- [ac09 148](#) *Evaluation of the stability and performance of an uncertain active noise control system*
Kay Kochan, Eugen Weizel and Delf Sachau
- [ac09 174](#) *Combined MIMO adaptive and decentralized controllers for broadband active noise and vibration control*
A.P. Berkhoff and J.M. Wesselink
- [ac09 242](#) *The application of Steiglitz-McBride algorithm in active noise control*
Jing Lu, Haishan Zou and Xiaojun Qiu

- [ac09_283](#) *Experimental studies on decentralized velocity feedback control on thin aluminum and honeycomb sandwich panels*
Jens Rohlfing and Paolo Gardonio
- [ac09_353](#) *Downscaling of decentralised feedback control units for active vibration control*
Paolo Gardonio and Cristobal Gonzalez Diaz
- [ac09_390](#) *Harmonic distortion control of a nonlinear loudspeaker*
Alessandro Toso and Marty Johnson
- [ac09_424](#) *Stability and control performance of decentralised velocity feedback loops using triangular actuators*
Paolo Gardonio, Yohko Aoki and Stephen J. Elliott
- [ac09_624](#) *Multi-channel broadband active noise control hardware system design*
Kai Chen, Jing Lu and Xiaojun Qiu
- [ac09_650](#) *A multi-input multi-output active noise cancelling system structure using subspace identification method*
Iwao Fujino
- [ac09_753](#) *Experimentally validated vibration control using negative capacitance on a panel*
Benjamin Beck, Kenneth A. Cunefare and Massimo Ruzzene
- [ac09_927](#) *Disturbance attenuation for switched linear systems*
Jamila Raouf and Hannah Michalska
- [ac09_941](#) *Stabilization of switched linear systems for H_∞ output feedback*
Jamila Raouf and Hannah Michalska

74.7 Processing by microphone arrays

- [ac09_558](#) *Active noise control using a steerable parametric array loudspeaker*
Nobuo Tanaka and Motoki Tanaka

75 Methods of Mathematical Modeling

75.3 Finite element methods (FEM)

- [ac09_420](#) *Simulation of active suppression of boring bar vibrations by means of boring bar's '1-D' finite element model*
Tatiana Smirnova, Henrik Akesson, Lars Hakansson, Ingvar Claesson and Thomas Lago
