

# CONTENTS

Preface .....	xxi
---------------	-----

List of Abbreviations Used in This Work .....	xxiii
---	-------

## PART ONE— PROFIT FROM NATURAL GAS PRODUCTION & SUPPLY AND OTHER FUEL SOURCES

### Chapter 1: US Gas Market Must Create a New Future

(David Fitzsimmons) .....	3
US Market Attractive, but There Are Misconceptions .....	4
Free Market Has Been Working but There Are Misconceptions .....	4
Supply and Demand in Balance Today .....	4
LNG Required to Support Growth.....	5
Steps Can Be Taken to Ensure Adequate Natural Gas .....	7

### Chapter 2: Nine Lessons about Public Opinion Concerning Nuclear Energy

(Ann Stouffer Bisconti) .....	11
Lesson One: Public Opinion is Not Always What it Seems.....	12
Lesson Two: Attitudes toward Nuclear Energy are Multidimensional.....	14
Lesson Three: People Support Building Plants Only When Need Seen .....	17
Lesson Four: NIMBY Does Not Necessarily Apply.....	18
Lesson Five: “Environmentalists Are Us” .....	18
Lesson Six: Public Opinion about Nuclear Energy is Changeable .....	19
Lesson Seven: Public Appreciates Positive Information about Nuclear Energy ...	20
Lesson Eight: Technical Jargon Should be Translated into Meaningful Terms...	21
Lesson Nine: A Positive Industry Attitude Can Build Support .....	22
Results of Understanding Public Opinion .....	24

## PART TWO—HOW TO MAKE CORPORATE GOVERNANCE PAY OFF

### Chapter 3: Electric and Natural Gas Corporate Governance Strong But

<b>Could Improve</b> (Matthew M. Orsagh) .....	27
Corporate Governance in Utilities and Energy .....	27
Governance Issues Unique to the Utilities Sector.....	29

Challenges and Opportunities for Utility Governance .....	30
Governance Outlook for the Coming Period .....	32
More Possible Good-Governance Steps.....	33
Independent Boards .....	34
Independent, Powerful Committees .....	34
Quality Directors .....	34
Board, Committee Performance Evaluations .....	34
Limited Related Party Transaction .....	35
Financial Transparency .....	35
Making Executives Earn Their Pay.....	35
Long-term Share-Ownership by Management and Directors .....	35
Limited Takeover Defenses .....	36
Strong Shareholder Rights and Equal Voting Rights.....	36
Empowered Employees.....	36
Access to the Board.....	36
Conclusion .....	37
<b>Appendix 3–1: Need for and Measurement of Strong Corporate Governance</b>	
Pendulum Swings Back .....	38
The Actors in This Drama.....	39
Defining the Term.....	40
Why Governance Matters.....	41
Anything That is Not Measured Will Not be Done .....	43
Anything That Can be Measured Can be Improved.....	43
Governance and Performance .....	43
Measurement of Governance.....	44
<b>Chapter 4: With Careful Use and Proper Focus, Ring-Fence Regulation Benefits Consumers</b> (Wayne P. Olson, Kristina Sepetys, and Enrique Torres Correa) .....	47
Role of Ring-Fencing in Accommodating Retail Competition .....	49
Purposes of Ring-Fencing Rules Such As Standards of Conduct.....	50
State Regulatory Rules about Ring-Fencing Issues.....	52
Complying with Ring-Fencing Rules While Maintaining an Efficient Industry Structure .....	57
Utility Compliance with Ring-Fencing Rules.....	59
Utility Responses To Ring-Fencing Requirements.....	60
New Forms of Vertical Integration Accommodate Competition .....	61
New Forms of Horizontal Integration Also Can Benefit Consumers .....	63
Corporate Restructuring Trends .....	64
Conclusion .....	66
<b>Appendix 4–1: Retail Competition/Electric Restructuring States</b> .....	67
<b>Appendix 4–2: FERC on Standards of Conduct and Economies of Scale and Scope</b> .....	70

# PART THREE—PROFITABLE STRATEGIES FROM INDUSTRY ECONOMICS AND FINANCE

<b>Chapter 5: Improving the Performance of Natural Gas Markets in Electricity System Reliability</b> (Matthew P. O’Loughlin, Daniel S. Arthur, and Elizabeth Lacey).....		75
New Challenges .....		75
Natural Gas–Electricity Interdependency.....		79
Increased Reliance on Market Center Purchases .....		79
FERC’s Interconnect Policy Causes Possible Supply and Demand Imbalance ....		82
Understanding a Pipeline’s Operational Capabilities.....		85
Role of Natural Gas Storage .....		87
Conclusion .....		89
 <b>Chapter 6: Competitive Power Procurement an Appropriate Strategy in a Quasi-Regulated World</b> (David E. Dismukes and Elizabeth A. Downer).....		 91
Changes in Markets Facilitate Need for Competitive Bidding.....		92
Comparison of Past and Present Practices.....		94
Competitive Bidding as a Means of Securing .....		97
Opportunities for Efficiency .....		97
Issues Associated with Competitive Bidding .....		100
Expedited Treatment of Resource Requests .....		100
Bidding Eligibility .....		100
Bid Evaluation Criteria .....		101
Detailed Filing Requirements .....		102
Affiliate Issues .....		102
Third-Party Administration of Bidding Process .....		103
Conclusion .....		104
 <b>Chapter 7: THE FALL AND RISE OF INTERMITTENT AND DISTRIBUTED GENERATION</b> (Robert C. Means).....		 105
Role in the Grid .....		106
Intermittent Generation .....		108
Wind: the Interaction of Technology and Regulation .....		109
Production Tax Credit.....		109
What Is Competitive? .....		111
Renewable Portfolio Standards.....		113
Beyond Tax Credits and Portfolio Standards .....		115
Production Tax Credits and Renewable Portfolio Standards .....		116
(Almost) Irrelevance of Tax Credits and Portfolio Standards for Solar .....		117

Role of Intermittent Generation.....	118
Solar PV.....	120
Solar Thermal .....	120
Wind.....	121
Distributed Generation.....	122
Distributed Generation and Technology .....	123
Role of Distributed Generation.....	126
Unavailability of Grid Power.....	127
Quality of Power .....	128
Cost of Power .....	128
Conclusion: The Two Faces of Distributed Generation.....	130
<b>Chapter 8: SFAS 143 Asset Retirement Obligations Strongly Affecting Electric &amp; Gas Companies (Gregory E. Scheig) .....</b>	<b>133</b>
Legal Obligations .....	136
Engineering Estimates .....	137
Financial Analysis .....	138
Current Practices and Events Leading to SFAS 143 .....	138
SFAS 143 Details .....	141
Fair Value Measurements .....	141
Asset Types Affected by SFAS 143 .....	142
Nuclear Production .....	142
Steam Production.....	144
Hydro Production .....	144
Electric Transmission And Distribution .....	145
Gas Transmission and Distribution .....	145
Other Long-Lived Assets .....	146
Lease Obligations .....	146
Remediation Responsibilities .....	147
Initial Entries Required for SFAS 143 .....	147
Impairment Issues .....	148
Rate-Regulated Entities .....	150
Looking Ahead .....	151
Case Study.....	153

# PART FOUR—BOLD NEW INDUSTRY TECHNOLOGIES

## Chapter 9: Intriguing Possibilities, Formidable Challenges in Hydrogen

<b>Economy</b> (Thomas TerBush) .....	157
The Hydrogen Economy .....	158
Potential Benefits of a Hydrogen Economy.....	158
Improved Energy Security.....	158
Significant Reduction of Global Greenhouse Gas and Particulates .....	159
Significant Improvements in Air Quality.....	159
Improved Energy Efficiency.....	159
Flexibility .....	159
Substantial Challenges Exist .....	159
Production Costs .....	159
Cost of Fuel Cells.....	161
Storage Technologies .....	161
Infrastructure.....	163
Safety.....	163
Consumer Attitudes.....	164
Path Forward.....	165
Hydrogen Production .....	165
Steam Reforming and Partial Oxidation.....	165
Electrolysis.....	166
Future Processes .....	167
Production Challenges .....	167
Production Outlook .....	167
Fuel Cells .....	168
Types of Fuel Cells.....	168
Fuel Cell Challenges .....	169
Likely Outcome.....	170
Storage.....	170
Compressed Hydrogen .....	172
Liquid Hydrogen .....	172
Hydrides and Nanostructures .....	173
Alternatives to Storage.....	173
Storage Outlook.....	173
Infrastructure.....	173
Environment .....	174
Greenhouse Gas and Particulate Emissions .....	174
Air Quality.....	174
Potential Negative Consequences .....	175
Leakages .....	175
Water Vapor .....	175

Safety .....	175
An Appealing but Uncertain Future .....	176
Bibliography.....	178
<b>Chapter 10: Electric Storage a Necessary Growth Area with</b>	
<b>Open Markets</b> (Richard Baxter) .....	179
Why Store Electricity? .....	179
Asset Utilization .....	181
Power Grid Evolution.....	182
Customer Choice.....	183
Market Drivers .....	184
Public Policy.....	185
Regulatory Goals and Strategy to Achieve Them.....	185
Federal and State Programs.....	186
Electric Storage Technologies.....	186
Pumped-Hydro Storage.....	187
Compressed Air Energy Storage (CAES) .....	188
Flow Batteries .....	188
Sodium-Sulfur Batteries.....	189
Lead Acid Batteries .....	189
Nickel Cadmium (NiCd) Batteries.....	190
Flywheels .....	190
Ultracapacitors.....	191
Superconducting Magnetic Energy Storage (SMES) .....	191
Thermal Energy Storage .....	192
Storage along the Electric Value Chain .....	192
Duration of Storage as a Determinant.....	192
Long-Term: Energy Management .....	193
Medium-Term: Bridging Power .....	193
Short-Term: Power Quality and Reliability .....	193
Generation Market .....	194
Applications .....	194
Potential Market Size.....	195
Transmission and Distribution .....	195
Applications .....	195
Potential Market Size.....	196
Retail Market .....	196
Applications .....	196
Potential Market Size.....	197
Renewable Energy .....	197
Will It Really Work? Lessons Learned from Other Markets.....	198
Gas Storage Success Holds Examples for Electric .....	198
Value of Storage .....	200
Technological Change.....	201
Regulatory.....	202

Going Forward.....	202
Additional Resources .....	204

## PART FIVE—PRACTICAL FEDERAL- OVERSIGHT ANALYSIS

### **Chapter 11: Market Cops Emerge in FERC Natural Gas Regulation**

(Richard G. Smead).....	207
Chairman Wood’s Priorities.....	208
Nature of the Chairman’s Initiatives .....	212
Progress on Security-Related Concerns .....	212
Development of Commission’s Key Market Role .....	213
Standards of Conduct Final Rule Makes Some Progress .....	213
Price Index Issues Raise Jurisdictional and Factual Questions .....	214
Other Market Developments—The Negotiated Rate Policy .....	216
The <i>Northern</i> Decision—FERC Must Explain Itself .....	217
Western Markets—the Response to 2001 .....	217
Commission’s Evolving Role in Industry Financial Health.....	218
Cash Management Rules .....	219
New Quarterly Reporting.....	220
Credit Standards .....	220
Supply and Infrastructure Critical to FERC Mission.....	222
LNG Policy and Developments.....	224
Gas Quality Issues for Domestic Supplies .....	226
Infrastructure Adequacy and Utilization—Emerging Issues.....	227
Gas-Electric Interdependency .....	227
Impact of the Pipeline Safety Improvement Act.....	228
The Commission in 2004 .....	228

### **Chapter 12: Major Upheaval in Environmental Regulation to Last Many**

<b>Years</b> (Roy S. Belden).....	229
Multipollutant Approaches.....	230
Clear Skies Initiative.....	231
Interstate Air Quality Rule .....	232
State Multipollutant Efforts .....	233
New York.....	233
Massachusetts .....	234
Connecticut.....	234
New Hampshire.....	234

North Carolina .....	235
Overview .....	235
Proposed Rules to Regulate Mercury from Power Plants .....	235
Federal Plans .....	235
Bumping Up against the Technology .....	238
State Mercury-Control Efforts Exceed Federal .....	240
Combustion Turbine MACT Rule .....	240
New Source Review .....	241
NSR Applicability Rule .....	241
Applicability Revisions .....	242
New NSR Applicability Rule Creates Controversy .....	245
NSR Equipment Replacement Rule .....	246
Ongoing Challenge to NSR Equipment Replacement Rule .....	251
More NSR Exemptions Expected .....	252
NOx Reduction Program .....	252
Ozone and Fine Particulate Matter Standards .....	253
Regional Haze .....	254
RECs .....	255
Trading in RECs .....	256
Ownership of RECs .....	258
CO2 Reductions and Kyoto .....	259
Kyoto Protocol .....	259
US Voluntary Reductions .....	261
State and Company Efforts to Reduce CO2 .....	262
CO2 Litigation .....	263
Chemical Security .....	265
<b>Chapter 13: With Bankruptcies and Blackouts, Litigation Continues to Roil the industry</b> (Anthony Michael Sabino) .....	265
Enron Continues to Unfold .....	266
Enron Shareholders—Should I Stay or Should I Go? .....	267
Home Is Where the Litigation Is .....	270
Who's in Charge? FERC, Courts Battle over Bankrupt Energy Companies .....	275
Mirant: Bankruptcy Law Prevails .....	275
NRG: FERC Prevails .....	280
Matter Undecided .....	282
Texas Lien Protects Texas Workers, Not Companies .....	284
And the Chips Continue to Fall .....	287
And the 2003 Blackout .....	289

# PART SIX— IN-DEPTH STATE REGULATORY ANALYSIS

## **Chapter 14: State Regulation Being Pushed and Pulled**

(William H. Smith Jr.) .....	293
Regulatory Changes .....	293
Reactive and Proactive Regulation .....	293
Regional Differences and Reaction to FERC's Standard Market Design (SMD) .....	294
State Budgets .....	296
Settlement Trends .....	297
Financial and Risk Management Issues .....	298
Industry Changes .....	299
Physical Security Requirements .....	299
Reconfiguration of Transmission Assets .....	302
Transmission Expansion Issues .....	303
Anticipation of Energy Bill .....	304

## **Chapter 15: Correct Performance-Based Regulation Strategy Can Yield**

<b>Benefits</b> (Lawrence Kaufmann and Mark Newton Lowry) .....	305
Competitive Environment and Cost of Service Regulation .....	305
Keys to Competitive Market Success .....	308
Potential Role of PBR .....	308
Potential Concerns with PBR .....	310
Illustration: Energy Supply .....	311
Factors Leading to Successful PBR Programs .....	313
Some Examples of PBR Success .....	314
Sempra Energy .....	315
Mississippi Power .....	315
Canadian Oil and Gas Utilities .....	316
Conclusion .....	316
<b>Appendix 15-1: North American PBR Plans</b> .....	317

## **Chapter 16: Texas' Deregulation a Bright Start, but Will It Continue?**

(Phillip T. Golden) .....	345
Texas Market Unique .....	346
Judging Deregulation Requires a New Paradigm .....	348
Competition .....	349
Ability of the Market to Meet Future Needs .....	350

Customer Impact.....	353
Pre-Market-Opening Events Provided Signs of Things to Come .....	354
Pilot Program Was a Limited Success.....	355
Enron's Collapse Was First Shoe to Drop .....	357
Is All Well in the Wholesale Market? .....	358
Challenges in the Ancillary Services Markets .....	359
August 2001 Price Spikes Were a Foreshadowing .....	359
Who Pays to Relieve Congestion? .....	360
Regulatory Changes Threaten New Generation.....	362
Renewables .....	363
Customer and Market Confusion in the New Market .....	364
Are Savings for Customers Real or Illusory?.....	365
Price-to-Beat Mechanism Is Establishing Headroom .....	365
Is Aggregation Gold or Pyrite?.....	367
Is Natural Gas the Real Driver? .....	367
Problems Experienced by Customers .....	368
New Communication Systems Have Not Been without Problems.....	368
Switching.....	368
Power on Demand from New Connections? .....	369
Billing Problems in the Texas Market.....	370
Texas Commercial Energy Makes Texas Look Like California .....	370
Is Texas a success? The Paradigm Revisited.....	372
Competition .....	372
Continued Development of the Market .....	373
Impact on the Customer .....	377
How Does Texas Compare with Other Deregulated States?.....	378
Well, at Least Texas Is Not California .....	379
Pennsylvania, the Quaker State, Remains a Big Q .....	381
Future of the Texas Market.....	383

## **PART SEVEN— COMPREHENSIVE INDUSTRY OUTLOOK**

### **Chapter 17: Though Stalled, Electric Reliability Act of 2003 Indicates**

<b>Federal Direction</b> (Dana Contratto) .....	389
Reliability .....	390
Statutory Text .....	390
Reliability; Commentary— Reliability Becomes Enforceable Nationwide .....	395
Transmission Siting.....	396
Statutory Text .....	396
Transmission Siting; Commentary—Federal Eminent-Domain Arrives at the Electric Industry .....	402
Western Transmission Infrastructure.....	403

Statutory Text .....	403
Western Transmission Infrastructure; Commentary — Special Attention to Western Transmission .....	405
Transmission Monitoring .....	405
Statutory Text .....	405
Transmission Monitoring; Commentary— East Meets West .....	405
Advanced Transmission Technologies.....	406
Statutory Text .....	406
Advanced Transmission Technologies; Commentary — Commission Expands into Technology Encouragement .....	407
Transmission and Distribution Programs .....	407
Statutory Text .....	407
Transmission and Distribution Programs; Commentary—A Step Forward ..	409
Power System Technology .....	409
Statutory Text .....	409
Power System Technology; Commentary —A Potentially Good Idea .....	410
Office of Electric Transmission and Distribution.....	410
Statutory Text .....	411
Office of Electric Transmission and Distribution; Commentary — Furthers the Objectives.....	411
“Public Power” Open-Access Transmission .....	412
Statutory Text .....	412
“Public Power” Open-Access Transmission; Commentary—FERC Expands Authority.....	413
Sense of Congress on RTO’s .....	414
Statutory Text .....	414
Sense of Congress on RTOs; Commentary —FERC Supported .....	414
RTO Progress Report.....	415
Statutory Text .....	415
RTO Progress Report; Commentary—Congressional Oversight .....	415
RTOs and Federal Utilities .....	416
Statutory Text .....	416
RTOs and Federal Utilities; Commentary—Easier to Join RTOs .....	417
Standard Market Design (SMD).....	417
Statutory Text .....	417
SMD; Commentary— FERC Should Become More Collegial .....	418
Native Load .....	418
Statutory Text .....	419
Native Load; Commentary—Owned Transmission Facilities to Be Used for Native Load First .....	420
Economic Dispatch.....	421
Statutory Text .....	421
Economic Dispatch; Commentary —Congress Looks for Improvements .....	421
Transmission Infrastructure Improvement Rulemaking .....	421
Statutory Text .....	422
Transmission Infrastructure Improvement Rulemaking; Commentary—A Nudge for Incentive Rates .....	423

Voluntary Transmission Pricing Plans.....	423
Statutory Text .....	423
Voluntary Transmission Pricing Plans; Commentary—Congress’s Limited Stand .....	425
PURPA Amendments .....	426
Statutory Text .....	426
PURPA Amendments; Commentary — Updated.....	433
PUHCA Amendments.....	435
Statutory Text .....	435
PUHCA Amendments; Commentary —the End of PUHCA.....	441
Market Transparency, Manipulation, and Consumer Protection .....	441
Statutory Text .....	441
Market Transparency, Manipulation, and Consumer Protection; Commentary—Another Reaction to California.....	445
Merger Review and Reform .....	446
Statutory Text .....	446
Merger Review; Commentary—Makes Merger Review More Systematic .....	449
Conclusion .....	449

## Appendices

<b>Appendix 1—North American Electric Reliability Council .....</b>	<b>453</b>
---	------------

### **Appendix 2: Primer—Texas Retail Electric Market Structure**

(Philip T. Golden).....	455
How Texas Legislature and Public Utility Commission Developed Competition	456
First Half of the Puzzle Is Deregulation of Wholesale Markets .....	457
Second Half of the Puzzle Was Senate Bill 7’s Deregulation .....	457
Who Has to Compete? .....	458
Need for an Independent System Operator.....	458
Unbundling of Vertically Integrated Utilities Revisits AT&T .....	459
Price-to-Beat Mechanism Provides Headroom .....	462
First Players Leave the Sandbox: House Bill 1692, Entergy, and SWEPCO .....	463

<b>EDITOR/PUBLISHER AND CONTRIBUTORS.....</b>	<b>465</b>
---	------------

<b>INDEX.....</b>	<b>469</b>
-------------------	------------
