

PRELUDE TO OUR 2012 PLANET-X COUNTDOWN

PART I

Exclusively Written For
The "X" Chronicles Newspaper
By:
Jaysen Q. Rand, Ph.D.

As we continue to press the ultimate question: Are we truly alone drifting through the universe? -Planet Earth...(her spiritual name-Urantia) remains a small/blue/watery world cast upon its intrepid journey hurtling through the black void of deep space lost in the Milky Way galaxy.

The human race, now over 6.5 billion strong, lives and dies upon this glorious world still locked into its eternal struggle between the forces of good and evil even as we enter into the 21st century of mankind's modern-day existence. And the paramount question facing us is: will we make it past 2012 into what the Mayan Codex Calendar Code describes as...The Cosmic End-Of-Time!

We complicated humans cling to this tiny space rock totally preoccupied inside our hectic day-to-day agendas. Meeting life's immediate needs/wants/desires is overwhelmingly paramount in most human daily existences. And so engrossed are we in our immediate environments that few people realize what's really going on in/around them. Even fewer people are privy to this 'larger picture;' a 'real life picture' affecting every life form's intelligence level and reality for their individual experience in this physical third dimensional world of materiality.

And although most people don't see this 'larger picture' of what's going on around them, many are just beginning to 'wake up.' Today, evermore individuals realize that 'something's not right about Earth's normal environment and operating patterns! Everybody's talking about her erratic weather, the dramatic increase in seasonal hurricanes, floods, earthquakes, active volcanoes, and the massive solar flare eruptions

(CME's) exploding from the surface of the Sun often times directed towards Earth with ever-greater frequency and potential for catastrophic consequence.

Today's feature films, television specials, weather related programs and topical documentaries are now exploring the prophetic warning signs regarding these upcoming Earth Changes and major bookstore chains offer us dozens of best-selling titles on the subject. Slowly but surely, people are beginning to 'tune' in to this 'larger picture!' Even younger children love learning from 20th Century Fox's recent Ice Age I & II films, both rated-P.G.

Humans are also waking up to the sub rosa reality of the UFO/ET phenomena. Numerous books / magazine articles / radio / television shows are captivating the public's attention-all dealing with this serious subject on a much more frequent basis. Most major world cities now have support groups and frequent lectures on the contactee / abductee phenomenon-with folks from all walks of life beginning to openly discuss their UFO/ET experiences regarding apparent 'genetic manipulation' at the hands of these other worldly beings. It should be noted that this aspect of our research soon proved to be much more involved /interesting / daunting than we ever imagined.

We suggest to our readers that they investigate this UFO/ET phenomenon with an open mind-linked to our concept that the 'larger picture' of our Planet-X saga may well involve a hidden important connection to the global UFO/ET hypothesis. There are literally thousands of books written on the subject available in bookstores, libraries and scattered all across the Internet.

We firmly believe UFOs/ETs are

intricately connected to our unfolding Planet-X drama and that they will be making their presence known in increasing numbers as we draw closer to 2009 and 2012. The latest Gallup poll survey still indicates that over 68% of Americans are believers...

Ultimately, the research/writing of The Return Of Planet-X focused in upon one aspect of this 'larger picture'-the approach and passage of a certain spent brown dwarf star (Wormwood-see Revelation Chap. 8, Vs. 11). We reviewed the catastrophic accounts of ancient cultures leaving rubble littering this planet-both above and below the watery abyss. And we also presented case evidence for our 'pole shift theory' and how these catastrophic events were brought about by a routine slippage of the Earth's crust around its fluid-like mantle on a cyclical cosmic schedule.

We also investigated the astronomical evidence supporting the approach of this brown dwarf star and the increasing physical changes manifesting on Earth as a direct result of its approach. And we also peered into the future through the eyes of gifted prophets and previewed how world governments are currently bracing themselves for these upcoming 2009/2012 global calamities.

And lastly-we reviewed the necessity of being spiritually, physically and emotionally prepared for these upcoming planetary events. The next passage of the brown dwarf will likely cause considerable physical damage to our planet possibly destroying major world population centers, their agriculture, utilities, their water supply sources, plus eliminating highways/roads/bridges, knocking out electrical power grid systems-thus in total-disrupting public services instantly.

Continued on Page 4

ARE UFOs REAL?

**There Will Be More Sightings
/ Contacts Than Ever in the
Next Few Years**

More than half of Americans are convinced UFOs exist. And 75% of Americans believe the U.S. government knows more about them than it is letting on. But according to Dr. Jaysen Q. Rand, within the next few years there will be simply no way to deny their existence any longer - not when sightings and even open contact with them becomes common place in present-day human society. Get ready for a story so shocking/revealing that it will make *The 'X' Files* look like a kid's bedtime story. Drawing on Ancient prophecies, Dr. Rand reveals why an explosion in paranormal activity is set to occur between now and the year 2012, and why life on Earth will be fundamentally changed by what we experience within the context of realizing the reality of Planet-X.

PRELUDE TO OUR 2012 PLANET-X COUNTDOWN

Continued From Page 3

Unfortunately, once our modern-day world is abruptly taken off line, most people will be in for a very harsh-rude awakening! Life here on Earth will never be the same again...

And it's highly probable that billions of people will survive the passage of the brown dwarf itself, but because few people will actually take the time to prepare/provide for their own personal self-sufficiency, many will likely perish after the initial wave of destruction sweeps over and across Earth. Simply put, millions of people won't be able to fend for, or defend themselves, once most of our 'taken for granted' 21st century conveniences and pleasures are suddenly eliminated.

As tragic as these approaching events are however, they are in reality, simply only one isolated part of what's really going on! This incoming celestial object and the destruction it's going to cause represents only one chapter of an even more mysterious unfolding celestial drama. The Return Of Planet-X book represents only that first chapter of a much 'larger work' presented in Earth Changes literature

So what about this larger picture in which the brown dwarf's passage plays its supporting role?

At this point in time you should be able to answer that question yourself. Think about it for a moment. We believe a brown dwarf is approaching planet Earth and our solar system in 2009 and 2012, and it's going to inflict significant damage upon us when it passes. We also believe it's possible that an ET race has created a special 'hybrid replacement population' they will set in place here should the vast majority [55-65%] of humanity be eliminated in the potential disaster of a pole shift event. And at the same time, the major governments and capitals of the world are bracing themselves for this upcoming event by taking steps to 'lock down' and 'preserve' as much of society as possible-ultimately attempting to remain in firm control by retaining their weakened dominance over planet Earth after the predicted pole shift event in December 2012. All 'Vegas' style bets are off as the many sides jockey into position for the final end games!

Can you now see certain conflicting 'agendas' hidden within this unforeseen cosmic tragedy?

For unbeknownst to most people, planet Earth is currently engaged in a great power struggle of galactic proportions. In the near future this planet is slated for great changes with a multitude of different/competing power groups (both on / off the planet), frantically laying plans to become the newest / badest / biggest 'top dog' power structure-once the smoke/death/destruction clears from the upcoming radical Islamic fascist-driven terrorist holocaust fully rips loose across the planet.

You could say that a 'cosmic battle' is currently being waged on battlefield Earth. This

conflict is taking place right in front of our eyes, as most humans appear 'out of touch' with what's really happening around them-thus failing to realize this conflict is even happening. Unfortunately, this evil battle is for ultimate control of our planet and the future of all humans inhabiting it.

On one side of this cosmic battlefield stands a global conglomerate of powerful individuals and governments (let's simply call them The Illuminatis), jockeying for their complete/individual 'positions of control'-once dreaded events of the brown dwarf's passage come to life. They're also preparing themselves and their respective societies covertly, in a clandestine manner that's also going unnoticed by the public. If these current power structures manage to maintain and later coordinate their all-powerful control centers secreted across this planet, we may also awake to find/face a world that's far more different/complex/dangerous than today.

On the other side of this planetary battlefield stands a group of alien entities that has (through intelligent genetic manipulation of our species), created a new race of Homo-hybrid beings scheduled to 'replace' much of the human population living on Earth at this time. And in reality, these same aliens are also replacing the current 'power structures' governing this world. They are doing it 'covertly' and in a manner that is largely going 'unnoticed' by the general public. This 'good-guy' Homo-hybrid race repopulates our planet after much of present-day humanity is eliminated during the pole shift event (2012). If these Homo-hybrids are successfully merged into place in the near future-planet Earth could become a far different place than it is today.

The global public is utterly oblivious to this raging 'power struggle' and is unfortunately caught up within their one-sided objectives. Once again, because the average person is so 'caught up' / 'distracted' by their family matters, daily jobs, hobbies, sports, fantasy football leagues, the latest consumer electronics and play-time games (including their 'must see' reality-based TV)-that they've become totally unaware of this clandestine cosmic battle currently raging around them.

Needless to say, since both sides in this galactic 'chess game' use their general populations to further their objectives (dominate control of the planet), it's in the vested interest of both parties to keep the public as ignorant as possible regarding what's really going on within global politics.

Truth of the matter is-we're now waging the biblical battle of Armageddon, the final struggle for planet Earth, the prophesied unholy war based on good versus evil-notwithstanding the threat of global terrorism. The upcoming passage of Wormwood is simply the 'cosmic catalyst' that sparks all sides into initiating their 'final control moves' on this living space rock-Earth.

Who will ultimately win this inevitable battle is unclear. All warring sides have not yet played out their cards-and these many-sided factions still have powerful aces hidden up their sleeves. We believe that the global war on terrorism is a many-faceted threat with implications that reach far beyond ethnic / fundamentalist/religious or political factions all

vying for power as 'X' arrives.

The universe in which we live-is truly a strange mixture of creative and destructive forces. Everywhere we look throughout the cosmos we see miraculous birth and great beauty indelibly mixed with unbridled destruction. Throughout the cosmos countless worlds are created and destroyed on a constant basis. Large interstellar clouds of gas and dust are giving birth to new stars while other, older stars are exploding in massive supernovas. Some planets, we believe, are being evacuated / abandoned forever while others are being repopulated and colonized-all part of the cosmic ebb and flow of the universe, the 'yin' and 'yang' of God's eternal creation!

The bigger picture as presented here must include the most recent aspects of what appears to be a growing escalation in the degree and severity of natural disasters that include abnormal seasonal weather patterns with much warmer winters / burning summers/with extended seasonal periods.

[See the Al Gore/Participant Films production of their feature film: An Inconvenient Truth]

Quoting from USA Today 29 August 2005: *"The giant iron ball at the center of Earth appears to be spinning slightly faster than the rest of the planet. The solid core, which measures about 1,500 miles in diameter, is spinning about one-quarter to one-half degree faster per year than the rest of the world, scientists from Columbia University and the University of Illinois at Urbana-Champaign report in the current issue of Science. Scientists are interested in the spin (aspects) of Earth's core because of its role in generating the magnetic field that protects the planet from solar blasts and its involvement in (the role of) volcanoes and earthquakes. The researchers base this conclusion on their analysis of travel times and shape of earthquake waves as they passed through the planet."* - END -

In our ongoing Planet-X discussion, we'd like remind our readers of what we believe are truly alarming global disaster statistics facing our world in the near future. Once again the old axiom stating that "our past reflects our future"-is best demonstrated by the existing stats and stories of disaster events and the astonishing cumulative numbers of natural catastrophes striking Earth from the near past to present-day 2007/2008.

Continued on Page5

PRELUDE TO OUR 2012 PLANET-X COUNTDOWN

Continued From Page 4

Geologically speaking, we're living in the Cenozoic era which began 65-million years ago. The start of this geologic period seemingly happened to coincide ('by chance') with what's believed to be one of the greatest of all natural disasters to ever strike Earth, that being a gigantic asteroid that theoretically smashed into what is now the Gulf of Mexico near the Yucatan Peninsula. It's further believed this asteroid event also caused the demise of the dinosaurs, a great catastrophe that signaled a dramatic new beginning for the evolution of most, if not all, life forms that were finally freed from these extreme predatory reptilian beasts stalking/terrorizing/controlling Earth for over 365-million years. (Who hasn't seen Steven Spielberg's great Jurassic Park trilogy?)

We believe it's vitally important for our readers to understand the relationship between Mother Nature and the world she rules over with its billions of human inhabitants. And in doing so-our book reviews historical perspectives on the history of natural disasters ravaging mother Earth in the past. We believe this review is critically important because of the current dramatic uptick in the degree, severity and recurrence of natural disasters presently afflicting this planet in record numbers since 1972. Question: "If our past reflects our future-

should we assume the worst for our future?" Not necessarily so-but it should serve as a guideline to our understanding the future and the how/when/where and why we should prepare for it-whatever comes our way!!

These newly presented statistics reflect once again what can be found throughout the recorded history of past human civilizations. In truth, we know very little about our actual history-the real history of the human race that has been in existence long before the start of our meager 'modern-day' recorded history, a fragmented/documented/lost antiquity of less than 7,000 years! Why is that? What could have happened over and over again that so decimated our history?

Quoting selected excerpts here from Chapter Three of our book may answer these questions of - The "What and Why?"

"The destructive events that have taken place in our past have cut us off from our ancestry however-and we do not hear their warnings. These past cataclysmic events are so geologically powerful and destructive that (like the ancient Egyptians said) they force us to "start over again as children," every several thousand years. - END -

"But once again, as centuries turn into millennia, these historical accounts start becoming vague and many of these important 'oral traditions' are simply forgotten -or discarded by future generations as foolishness. Unfortunately "ignorance of the past equals ignorance of the future." - END -

"Then, thousands of years later, these 'new world' civilizations are once again revisited by the "usual inundation" caused by Earth Changes and caught off guard tragically de-destroyed just like the 'old world' civilizations before them and those before them. - END -

"And so it goes again once again-over and over and over. Destruction, followed by rebuilding, followed by destruction again! The ancient cultures were right when they said that, "We live in the 'fourth world' and that the preceding 'three worlds' have all been destroyed by global cataclysms." - END -

"The shattered remains of ancient buildings scattered over the many landscapes of our planet are screaming at us to 'wake up' and tune into the 'bigger picture' and what has transpired on our world in the past, and what will possibly transpire again in the near future. - END -

"The enormous piles of human and animal remains (chaotically entombed in so many locations throughout the world) are a blatantly telegraphed warning-spelling out for us the reality of the dire situation we are once again about to experience. - END -

- Buys You the Vital Time to Escape

PRELUDE TO OUR 2012 PLANET-X COUNTDOWN

Continued From Page 5

"Our planet is littered with the remains of violently destroyed civilizations! The ruins lying underwater off present-day Egypt, Malta, Japan, India, Cuba, the Bahamas and many other locations around the world, are also calling out-trying to send us a clear warning of the great 'cycles of destruction' and the "usual inundation" that has claimed the lives of so many hundreds of millions in the past-and is (once again) rapidly headed our way. We have therefore 'lost our legacy' and the ability to 'understand our past destinies' -we humans are truly a species aimlessly adrift in space, unwitting victims of a cosmic drama far and away beyond our comprehension and acceptance!" - END -

The global statistics offered in our tome aren't meant to scare our readers, but to warn them not to make the same mistakes that past civilizations/cultures have made before them. And we believe the Planet-X issue (existing as an actual threat to our solar system and planet Earth), seems to have been lost in the information shuffle and a possible cover-up not only by our government and NASA-but also by most major free-world governments also dealing with the common threat of Planet-X. Quoting from a 23 October 1996 Associated Press article entitled: - New Rebel Planet Found Outside The Solar System...-

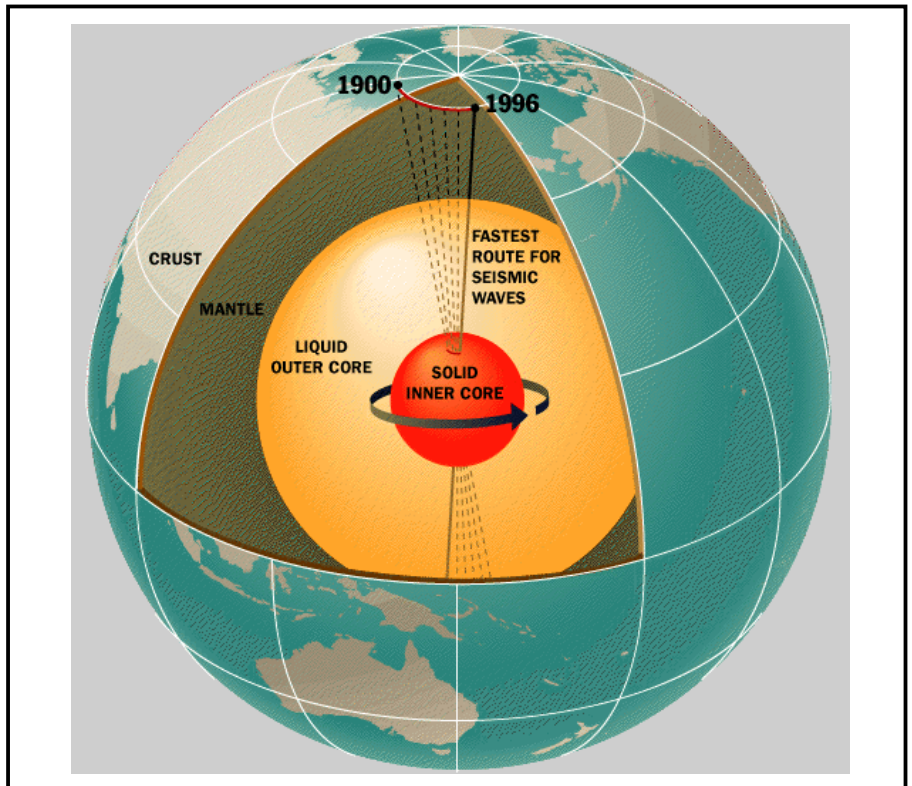

A new planet that breaks all the rules about how and where planets form has been identified in the orbit of a twin star about 70 light-years from Earth in a constellation commonly known as the Northern Cross. This new planet has a roller coaster like orbit that swoops down close to its central star then swings far out into frigid fringes, following a strange egg-shaped orbit that is unlike that of any other known planet. - END -

Is it so far fetched then-that Planet-X could well be another example of a rogue planet, or in this case, a brown dwarf star that follows this same type of irregular orbit around its own sun?

As our several Websites come on line we will be providing our readers with viable updated and scientifically oriented material carefully extracted from the Internet, newspapers, magazines (both scientific and non) and a host of related on topic references: www.returnofplanet-x.com, www.surviveplanet-x.com, www.futureworldmedia.com

Note: Additional Internet Websites to be added in the future.

If a major pole shift is in our future, maybe we should begin by revealing the fact that Earth's magnetic pole appears to be drifting/shifting more quickly than ever before. Could this be another dramatic sign that Mother Earth is about to recreate herself? Quoting from a 2005 Associated Press article appearing on the American Geophysical Union's Internet site (<http://www.agu.org>):

- Earth's Magnetic Pole Is Shifting -

Earth's north magnetic pole is drifting away from North America and toward Siberia at such a clip that Alaska might lose its spectacular Northern Lights in the next 50 years, scientists said.

Despite accelerated movement over the past century, the possibility that Earth's modestly fading magnetic field will collapse is remote. But the shift could mean Alaska may no longer see the sky lights known as auroras, which might then be more visible in more southerly areas of Siberia and Europe.

The magnetic poles are part of the magnet field generated by liquid iron in Earth's core and are different from the geographic poles... the surface points marking the axis of the planet's rotation. Scientists have long known that magnetic poles migrate and in rare cases, swap places. Exactly why this happens is a mystery.

"This may be part of a normal oscillation and it will eventually migrate back towards Canada," Joseph Stoner, a paleomagnetist at Oregon State University, said at a recent American Geophysical Union meeting. Previous studies have shown that the strength of the Earth's magnetic shield has decreased 10 percent over the past 150 years. During the same period, the north magnetic pole wandered about 685 miles out into the Arctic, according to a new analysis by Stoner.

The rate of the magnetic pole's movement has increased the last century compared to fairly steady movement in the previous four centuries, the Oregon researchers said. At the present rate, the north magnetic pole could swing out of northern Canada into Siberia. If that happens, Alaska could lose its Northern Lights, which occur when charged particles streaming away from the sun interact with different gases in Earth's atmosphere.

The north magnetic pole was first discovered in 1831 and when it was revisited in

1904, explorers found that the pole had moved 31 miles.

For centuries, navigators using compasses had to learn to deal with the difference between magnetic and geographic north. A compass needle points to the north magnetic pole, not the geographic North Pole. For example, a compass reading of north in Oregon is about 17 degrees east of geographic north.

In the study, Stoner examined the sediment record from several arctic lakes. Since the sediments record the Earth's magnetic field at the time, scientists used carbon dating to track changes in the (planet's) magnetic field. They found that the north magnetic field shifted significantly in the last thousand years. It generally migrated between northern Canada and Siberia, but it sometimes moved in other directions, too. - END -

Continued From Page 6

Reflections on Earth's unknown future...

Whatever fate awaits us-Mother Earth is about to reveal her secrets regarding the reality of Planet-X coming in 2009/2012. One thing is absolutely certain!!Something 'BIG' is radically wrong with the normal functioning of planet Earth's global operating systems and mankind's ability to either control or understand these cosmic forces / dynamics... And time, we believe... is rapidly running out in the landscape of human life as we are living it here on the Earth in 2007.

The world today is a truly dangerous place. The global threat of Islamic fundamentalist terror-ism appears to be only the tip of the iceberg. With political turmoil/instability/fear of nuclear proliferation dominating affairs in the Middle East, plus Iraq / Iran, high gas / fuel prices, corporate greed, congressional scandals, wild fires, national / regional / global natural disasters on the rise-who needs an impudent and ineffective United Nations assembly trying to keep it all together?

And Planet-X may not be the only outer space visitor threatening Earth in the near future!

According to a 29 August 2005 USA Today news article written by Dan Vergano:

Astronomers are now debating what to do about Earth's close encounter with a huge asteroid in 2029-again in 2036, a near Earth passages that might be way too close for comfort. The key question about Apophis is whether its 2029 trajectory will go through a roughly 2,000-foot-wide region called a "keyhole," an important component for Earth.

Apophis, a 1,059-foot-wide asteroid, has excited astronomers since it was first spotted last year. After observing it for a while, scientists concluded that it has only a 1-in-8,000 chance of ever smacking Earth. But even that slim chance has them talking and NASA pondering how to keep track of it-just in case. This asteroid passes close to Earth (within 22,600 miles) every seven or eight years, but the 2029 trajectory is expected to be its closest approach ever. If the asteroid were to strike Earth, scientists say the impact would be felt somewhere on a line stretching from Japan to the Caribbean creating a roughly 2-mile-wide crater probably causing a devastating global tsunami.

According to NASA scientists, this asteroid should be visible, about as bright as the stars in the Big Dipper constellation, to observers in Europe. Such a close asteroid flyby comes only once every 1,500 years-certainly a profound scientific opportunity. - END -

It's easy to understand why many writers, news commentators and religious leaders are now beginning to agree that as a modern-day global society-we may be approaching the End-Times. Our bibliography section lists a number of well-written books on

the subject with the same theme being repeated in hundreds of current news magazines, videos and Hollywood motion pictures.

Our book wasn't written with a dire doomsday theme, but rather as a sober wakeup call to what appears to be dramatic changes coming to our planet's political, social, religious aspects and in its global weather patterns. What we've tried to demonstrate in our work is the 'larger picture' of what appears to be a cosmic agenda in place for planet Earth-perhaps our End-Times Prophecy.

As a subject of scientific interest Newsweek and U.S. News & World Report carried past stories on "X." Quoting first from Newsweek covering this topic in its 28 June 1982 article entitled:

- Does the Sun Have a Dark Companion? -

A 'dark companion' could produce the unseen force that seems to tug at Uranus and Neptune, speeding them up at one point in their orbits and holding them back as they pass...the best bet is a dark star orbiting at least 50 billion miles beyond Pluto. It is most likely either a brown dwarf, or a neutron star. Others suggest it is a tenth planet, since a companion star would tug at the other planets, not just Uranus and Neptune. - END -

Quoting from the second article in U.S. News & World Report 10 September 1984 entitled:

- Planet-X - Is It Really Out There? -

Shrouded from the sun's light, mysteriously tugging at the orbits of Uranus and Neptune, is an unseen force that astronomers suspect may be Planet-X - a 10th resident of the Earth's celestial neighborhood. Last year, the infrared astronomical satellite (IRAS), circling in a polar orbit 560 miles from Earth, detected heat from an object about 50 billion miles away that is now the subject of intense speculation. - END -

Regardless of what your personal beliefs are regarding the true reality of Planet-X, religion, the subject of UFOs and ETs, global warming, partisan election politics and Islamic fundamentalist terrorism-our daily existence and continued life on this world is affected every day by what happens to and around us as a local and global community. Hopefully our book, The Return Of Planet-X, offers you a second chance to understand the bigger picture of life and existence here on spaceship Earth, our home planet in the Milky Way galaxy.

We should also point out that the Internet offers a rich array of websites / blogs / commentary and research (both professional and non) covering the subject of Planet-X / Nibiru / Wormwood and a host of related material on topic. We encourage you to seek other ideas / viewpoints and opinions on Planet-X-thus rounding out your understanding of the facts and non-facts in your discovery.

Planet-X is admittedly a volatile / argumentative/controversial/and in many cases-a politically/ socially/and religiously charged subject. By keeping an open mind, heart and spirit-your vested interest level will provide rich rewards both surprising and plentiful to all

seekers of the 'truth.'

In the January 2008 issue of the "X" Chronicles, we'll pick up Part Two in the "Prelude To Our 2012 Planet-X Countdown" - see you on the other side of the new year.

We suggest visiting our exciting new website at www.returnofplanet-x.com for interesting and challenging details about Planet-X and how to obtain a copy of our hit book in either paperback and e-book version. Our third printing is now in distribution to bookstores and on Amazon.com.
