Are UFOs Real? This Guest Explains Why There Will be More Sightings/Contacts Than Ever in the Next Few Years

by [Admin](#) on Wed 15 Aug 2007 04:35 PM EDT | [Permanent Link](#)

More than half of Americans are convinced UFOs exist. And 75 percent of us believe the government knows more about them than it is letting on. But according to **Dr. Jaysen Q. Rand**, within the next few years there will simply be no way to deny their existence any longer — not when sightings and even open contact with them becomes commonplace.

Get ready for a story so shocking/revealing that it will make The X-Files look like a kid's bedtime story. Drawing on ancient texts — including the Bible — and Native American prophecies, Dr. Rand will reveal why an explosion in paranormal activity is set to occur between now and the year 2012, and why life on Earth will be fundamentally changed by what we experience. He'll reveal:

- Why the return of the mysterious "Planet X" — as predicted in religious texts and ancient prophecy — will usher in one of the most turbulent periods in world history.
- Why 2009 will see the start of an explosion in contact with UFOs and alien
